

Proposed Special Condition 11 to Permit #ERSP2019-0389

1. The permittee shall construct the monopine using the best available technology at that time to adhere all branches, bark, and needles to prevent shedding. The permittee shall maintain the monopine for as long as it is present in a condition consistent with the approved project plans. If any branches, bark, or needle clusters dislodge from the monopine then the materials shall be replaced using best available technology at that time. Material colors shall also be consistent with the approved project plans.
2. The permittee is responsible for keeping the site clean of material dislodged from the monopine for as long as the monopine is present. The site, and surrounding area, shall be inspected in the Spring after snow melt and in the Fall prior to snow fall and cleaned of all visible material dislodged from the tree including branches, bark, needle clusters and associated fragments. All collected debris shall be immediately removed from the site and disposed of properly.
