1. Introduction and Agency Background

Introduction:

Beginning in 2020, TRPA began work on the Tahoe Living Initiative, which implements the housing and community revitalization goals of the Regional Plan. It identifies key actions that TRPA can take to create complete communities that provide housing for all, an appropriate mix of uses to support vibrant, walkable, bikeable, transit-friendly neighborhoods, and the necessary infrastructure to protect our unique and precious environment. TRPA formed a working group made up of representatives with expertise in the development of affordable housing to help guide the policy changes undertaken in the initiative. As the permitting authority for the basin (along with the local jurisdictions, i.e., the City of South Lake Tahoe and four counties), TRPA can change zoning and development standards to help make affordable housing more financially viable.

TRPA Background Information:

Established in 1969, by a Federally sponsored, interstate compact between California and Nevada, TRPA is authorized under California law (California Government Code sections 66800 through 66801), Nevada law (NRS 277.190 through 227.200), and Federal law (PL 96-551).

The mission of TRPA is to “lead the cooperative effort to preserve, restore, and enhance the unique natural and human environment of the Lake Tahoe Region, while improving local communities, and people’s interactions with our irreplaceable environment.” TRPA is the leading partner for plans and actions to preserve the environment of the Tahoe region. TRPA establishes transportation and land use policy as the region’s Metropolitan Planning Organization and works with local, regional, state, and Federal organizations and governments to facilitate a cooperative approach in implementing these plans and programs. The TRPA Regional Plan is designed to maintain a healthy natural environment, meet adopted environmental thresholds, maintain social and economic health, and allow orderly growth in the Region.

TRPA is governed by a 15-member Board. California and Nevada each have seven members comprised of elected officials and governmental appointees. In addition, a non-voting member is appointed by the President of the United States. Further information can be obtained at TRPA’s website at www.trpa.gov.

Lake Tahoe faces a constant and serious threat from the introduction and spread of aquatic invasive species (AIS). AIS can devastate aquatic ecosystems, and negatively impact the recreation opportunities that drive Lake Tahoe’s economy. The Lake Tahoe Aquatic Invasive Species Program’s mission is to prevent, detect, and control aquatic invasive species in the region so that future generations can enjoy Lake Tahoe. TRPA and the Tahoe Resource Conservation District lead the program in collaboration with the public and private partners.

TRPA is granted environmental planning and regulatory authority at Lake Tahoe pursuant to the Tahoe Regional Planning Compact (Public Law 96-551). TRPA requires all projects to be consistent with the applicable development and environmental standards found throughout the TRPA Regional Plan package.

2. Project Description

Scope of Work

Description

In December 2023, TRPA approved the Phase 2 Affordable and Workforce Housing Amendments, a set of policy changes to parking, density, height, and coverage regulations to help make affordable and workforce housing more financially feasible. [Previous analysis](#) showed that density and parking requirements, discouraged the development of smaller homes that could be more affordable to the local workforce. The policy changes approved as part of the Phase 2 Housing Amendments allow for more flexible development standards, including reduced parking requirements for deed-restricted affordable, moderate, and achievable housing in town centers and areas of the basin zoned for multi-family residential.

The approved changes allow projects to submit a parking analysis that shows the anticipated parking demand of their project and either build the amount of parking that meets the demand or provide alternative transportation options. Alternative transportation options could include shared parking agreements with an adjacent property owner, unbundling parking from rent so tenants who do not need parking do not need to pay for it, or providing an onsite car share program, to name a few. The detailed Code language is included below:

34.4. PARKING

34.4.1. Parking for Deed-Restricted Affordable, Moderate, or Achievable Housing

No vehicle parking minimums shall apply to residential or mixed-use developments made up of 100 percent deed-restricted affordable, moderate, or achievable housing units, as described in subsection 36.13 if located within a Town Center, Regional Center, or High-Density Tourist District as defined in the Regional Plan. Outside of centers, parking minimums shall be no greater than .75 spaces per unit, on average. In either case, in order to deviate from existing local parking minimums, the project applicant shall demonstrate that parking demand generated by the project, as determined by a parking analysis or information from similarly situated projects, will be accommodated. The applicant may demonstrate compliance through parking management strategies, including but not limited to executed shared parking agreements, unbundling parking and rent, or contributing to alternative transportation methods. Mixed-use projects shall meet local parking requirements for the non-residential portion of the development.

During the process, staff received feedback that requiring project applicants to submit a parking study is one more impediment to building housing. As a result, TRPA is seeking a consultant to conduct a parking study that would identify the parking demand for a variety of affordable and workforce housing types. It is anticipated that the consultant will use parking counts from existing housing developments both within and outside the Tahoe Basin. In addition, the consultant should provide best practices to determine a recommendation for the amount of parking that should be required for deed-restricted housing during the permitting process. The recommendations provided by the consultant could be used

by project applicants building deed-restricted housing in the future, eliminating the need for an applicant-funded study.

Project goal

Establish a parking data set that can be used to inform anticipated parking demand for a variety of future affordable and workforce housing projects that may be built throughout the region, including deed-restricted affordable, moderate, achievable housing in town centers and in areas zoned multi-family¹. The data should be based on parking demand at existing developments, and should be Tahoe-based to the extent feasible.

Deliverables

- 1. Parking Counts:** Parking counts for a variety of existing affordable and workforce housing types (at least four) throughout the region.
- 2. Parking Demand:** A memo summarizing the parking demand by unit size (i.e., studio, 1 bedroom, 2 bedroom) and housing type.
