

Rationale:

The Tahoe Keys Lagoons Aquatic Weed Control Methods Test EIS identified potential impacts to Environmental Health, Water Quality and Aquatic Biology and Ecology (See Table ES-1 of the EIS). Mitigations proposed for these environmental issues reduce all impacts to less than significant.

Finding 80.3.3.C

The applicant has taken reasonable steps to protect the land, water, and air resources of both the applicant's property and that of surrounding property owners.

Rationale:

Proposed actions will have no impact or less than significant impacts to land and air resources to the applicant's or surround property owners. Potential water quality impacts identified in the Tahoe Keys Lagoons Aquatic Weed Control Methods Test EIS can be mitigated to less than significant and are described in the Rationale above.

Finding 80.3.3.D

The project, and the related use, will not change the character of the neighborhood, detrimentally affect or alter the purpose of any applicable plan area statement, community, redevelopment, specific, or master plan.

Rationale:

The proposed project is a test to obtain information of future aquatic weed control for the entirety of the Tahoe Keys, which is intended to improve the conditions within the neighborhood. The proposed test project will not change the character of the neighborhood, detrimentally affect or alter the purpose of any applicable plan area statement, community, redevelopment, specific, or master plan.
