Hi Steve & Matt,

Some additional information that I learned today when talking to Jess Stueven, who is the head of the Tahoe Pines HOA. She told me that she use to have a jet ski on John Mapes' buoy many years ago and that she stopped using that buoy approximately 10 years ago. When she took her jet ski off the buoy, she took the ball off and gave it back to John Mapes. She said that the reason for taking it off the buoy was that they were too close together and boats were hitting each other. John recently told her in July that he put the buoy back in the water and intended to rent it out.

She also told me that the HOA has never had an approved buoy field; only the pier lease through State Lands. She said that the last time the pier lease was renewed that State Lands said that they could have a pier lease or buoys; but not both.

Hope that is helpful,

Allen

> As discussed on the phone last week, TRPA will not be doing any enforcement regarding the Tahoe Pines HOA buoy field until we have given everyone the opportunity to apply through this first round of buoy permitting. Once we can properly identify all of the legal moorings in this area we can start requiring removal of the unauthorized buoys.
