1. Introduction and Agency Background

Introduction:

Lake Tahoe's nearshore is the portion of the lake that people interact with when viewing the lake from the shore, wading, swimming, enjoying paddle sports, and boating. This RFP is part of the Research and Analysis Division's work to implement monitoring priorities identified in the recently adopted Shoreline Plan and by the Nearshore Agency Working Group as part of the Nearshore Resource Allocation Plan.

The Nearshore Resource Allocation Program (NRAP) directs nearshore science and monitoring investment through a systematic framework to better understand nearshore conditions and processes and reduce uncertainty about management actions. The NRAP is structured around a series of environmental focus areas, each with unique conditions and challenges. Human health was identified as one of six focus areas for nearshore management in 2018, and the Nearshore Human Health monitoring plan has been implemented each summer since.

TRPA Background Information:

Established in 1969, by a Federally sponsored, interstate compact between California and Nevada, TRPA is authorized under California law (California Government Code sections 66800 through 66801), Nevada law (NRS 277.190 through 227.200), and Federal law (PL 96-551).

The mission of TRPA is to "lead the cooperative effort to preserve, restore, and enhance the unique natural and human environment of the Lake Tahoe Region, while improving local communities, and people's interactions with our irreplaceable environment." TRPA is the leading partner for plans and actions to preserve the environment of the Tahoe region. TRPA establishes transportation and land use policy as the region's Metropolitan Planning Organization and works with local, regional, state, and Federal organizations and governments to facilitate a cooperative approach in implementing these plans and programs. The TRPA Regional Plan is designed to maintain a healthy natural environment, meet adopted environmental thresholds, maintain social and economic health, and allow orderly growth in the Region.

TRPA is governed by a 15-member Board. California and Nevada each have seven members comprised of elected officials and governmental appointees. In addition, a non-voting member is appointed by the President of the United States. Further information can be obtained at TRPA's website at www.trpa.gov.

Lake Tahoe faces a constant and serious threat from the introduction and spread of aquatic invasive species (AIS). AIS can devastate aquatic ecosystems, and negatively impact the recreation opportunities that drive Lake Tahoe's economy. The Lake Tahoe Aquatic Invasive Species Program's mission is to prevent, detect, and control aquatic invasive species in the region so that future generations can enjoy Lake Tahoe. TRPA and the Tahoe Resource Conservation District lead the program in collaboration with the public and private partners.

TRPA is granted environmental planning and regulatory authority at Lake Tahoe pursuant to the Tahoe Regional Planning Compact (Public Law 96-551). TRPA requires all projects to be consistent with the applicable development and environmental standards found throughout the TRPA Regional Plan package.

2. Project Description

Scope of Work

Implement the Nearshore Human Health monitoring program.

The monitoring program consists of the collection of water quality samples from 7 shoreline sites once a week during a 10-week period over the summer. Samples are analyzed for the presence and concentration of *Escherichia coli* (*E. coli*) by a qualified laboratory. Qualified or properly trained technicians are expected to collect water samples and transport samples to a laboratory according to standard methods. A basic monitoring plan before the commencement of collecting samples and a basic final report documenting methods and results should be included.

Annually the program consists of:

1. Project kick-off meeting with the Nearshore Agency Working to determine sampling locations and review potential changes from the prior year
2. Submission of a sampling analysis plan
3. Weekly sampling and reporting of results
4. Final report summarizing seasonal findings and any recommendations for programmatic modification

Additional details and past program reports can be found on [Laketahoeinfo.org](https://monitoring.laketahoeinfo.org/MonitoringProgram/Detail/76) at <https://monitoring.laketahoeinfo.org/MonitoringProgram/Detail/76>
