

Delivered January 25, 2022

Petition title: Save Lake Tahoe from Herbicides and Aquatic Weeds!

Petition language

No weeds or herbicides for Lake Tahoe!

I support Alternative AA1 of your Tahoe Keys Weeds Draft Environmental Impact Report.

The Tahoe Keys lagoons are an environmental disaster at Lake Tahoe. Proof of this are the infestations of aquatic invasive weeds now thriving there and the proposals to control these weeds with herbicides. These weeds are destroying Tahoe's legendary clarity and purity. Proposals to control them with herbicides only poisons the lake further.

I am absolutely opposed to any and all use of poisonous herbicides in the Keys and any other waters that connect to Lake Tahoe -- a Tier 3 Outstanding National Resource Water. I oppose spending tens of millions of taxpayer dollars for the convenience of boat-owners at the Tahoe Keys. I join The Sierra Club Tahoe Area Group in defending the purity of Lake Tahoe.
