**Subject:** [BULK] Boulder Bay Project Concerns

---

The number one cause of Tahoe's problems is too many people. 15 million people visit Tahoe annually. The Tahoe Regional Planning Agency (TRPA) and the Counties: Placer, Eldorado, Washoe, Douglas, Carson City are directly adding to the problem in the name of preservation. Getting more creative at describing or packaging our problems doesn't mean we are smarter at getting needed answers to solve them. Smart growth, sustainable tourism and other clever names and phrases sound progressive, but too often simply promote more of everything, mostly more development.

As Concerned citizens we want solutions...Not more greenwashing.

We are getting further trapped in this culture of more. More residents, more development, more tourists at more times of the year, more taxes, more attractions, more, more, more.

It is clearly not working. We mostly have more problems.

We are considering a petition that TRPA and the Counties do the following:

1. Determine the carrying capacity of the Lake Tahoe Basin and develop methods to stay within that maximum. This may mean not allowing more large projects and attractions.
2. Stop automatically renewing development permits every three years.
3. Require current environmental analysis of projects approved more than 5 years prior that result in more than 100 vehicle trips per day. Particularly traffic analysis.
4. Don't allow phasing of projects to circumvent and delay required mitigations such as traffic analysis, water quality and employee housing.

We are drafting a petition and we'd like community response and community involvement. Concerned citizens and Lake Tahoe lovers please send us your input and suggestions.

**Subject:** Boulder Bay Project Concerns

---

The number one cause of Tahoe's problems is too many people. 15 million people visit Tahoe annually. The Tahoe Regional Planning Agency (TRPA) and the Counties: Placer, Eldorado, Washoe, Douglas, Carson City are directly adding to the problem in the name of preservation. Getting more creative at describing or packaging our problems doesn't mean we are smarter at getting needed answers to solve them. Smart growth, sustainable tourism and other clever names and phrases sound progressive, but too often simply promote more of everything, mostly more development.

As Concerned citizens we want solutions...Not more greenwashing.

We are getting further trapped in this culture of more. More residents, more development, more tourists at more times of the year, more taxes, more attractions, more, more, more.

It is clearly not working. We mostly have more problems.

We are considering a petition that TRPA and the Counties do the following:

1. Determine the carrying capacity of the Lake Tahoe Basin and develop methods to stay within that maximum. This may mean not allowing more large projects and attractions.
2. Stop automatically renewing development permits every three years.
3. Require current environmental analysis of projects approved more than 5 years prior that result in more than 100 vehicle trips per day. Particularly traffic analysis.
4. Don't allow phasing of projects to circumvent and delay required mitigations such as traffic analysis, water quality and employee housing.

We are drafting a petition and we'd like community response and community involvement. Concerned citizens and Lake Tahoe lovers please send us your input and suggestions.

**Subject:** Boulder Bay Project Concerns

---

The number one cause of Tahoe's problems is too many people. 15 million people visit Tahoe annually. The Tahoe Regional Planning Agency (TRPA) and the Counties: Placer, Eldorado, Washoe, Douglas, Carson City are directly adding to the problem in the name of preservation. Getting more creative at describing or packaging our problems doesn't mean we are smarter at getting needed answers to solve them. Smart growth, sustainable tourism and other clever names and phrases sound progressive, but too often simply promote more of everything, mostly more development.

As Concerned citizens we want solutions...Not more greenwashing.

We are getting further trapped in this culture of more. More residents, more development, more tourists at more times of the year, more taxes, more attractions, more, more, more.

It is clearly not working. We mostly have more problems.

We are considering a petition that TRPA and the Counties do the following:

1. Determine the carrying capacity of the Lake Tahoe Basin and develop methods to stay within that maximum. This may mean not allowing more large projects and attractions.
2. Stop automatically renewing development permits every three years.
3. Require current environmental analysis of projects approved more than 5 years prior that result in more than 100 vehicle trips per day. Particularly traffic analysis.
4. Don't allow phasing of projects to circumvent and delay required mitigations such as traffic analysis, water quality and employee housing.

We are drafting a petition and we'd like community response and community involvement. Concerned citizens and Lake Tahoe lovers please send us your input and suggestions.

**Subject:** Boulder Bay Project Concerns

---

The number one cause of Tahoe's problems is too many people. 15 million people visit Tahoe annually. The Tahoe Regional Planning Agency (TRPA) and the Counties: Placer, Eldorado, Washoe, Douglas, Carson City are directly adding to the problem in the name of preservation. Getting more creative at describing or packaging our problems doesn't mean we are smarter at getting needed answers to solve them. Smart growth, sustainable tourism and other clever names and phrases sound progressive, but too often simply promote more of everything, mostly more development.

As Concerned citizens we want solutions...Not more greenwashing.

We are getting further trapped in this culture of more. More residents, more development, more tourists at more times of the year, more taxes, more attractions, more, more, more.

It is clearly not working. We mostly have more problems.

We are considering a petition that TRPA and the Counties do the following:

1. Determine the carrying capacity of the Lake Tahoe Basin and develop methods to stay within that maximum. This may mean not allowing more large projects and attractions.
2. Stop automatically renewing development permits every three years.
3. Require current environmental analysis of projects approved more than 5 years prior that result in more than 100 vehicle trips per day. Particularly traffic analysis.
4. Don't allow phasing of projects to circumvent and delay required mitigations such as traffic analysis, water quality and employee housing.

We are drafting a petition and we'd like community response and community involvement. Concerned citizens and Lake Tahoe lovers please send us your input and suggestions.

**Subject:** Boulder Bay Project Concerns

---

The number one cause of Tahoe's problems is too many people. 15 million people visit Tahoe annually. The Tahoe Regional Planning Agency (TRPA) and the Counties: Placer, Eldorado, Washoe, Douglas, Carson City are directly adding to the problem in the name of preservation. Getting more creative at describing or packaging our problems doesn't mean we are smarter at getting needed answers to solve them. Smart growth, sustainable tourism and other clever names and phrases sound progressive, but too often simply promote more of everything, mostly more development.

As Concerned citizens we want solutions...Not more greenwashing.

We are getting further trapped in this culture of more. More residents, more development, more tourists at more times of the year, more taxes, more attractions, more, more, more.

It is clearly not working. We mostly have more problems.

We are considering a petition that TRPA and the Counties do the following:

1. Determine the carrying capacity of the Lake Tahoe Basin and develop methods to stay within that maximum. This may mean not allowing more large projects and attractions.
2. Stop automatically renewing development permits every three years.
3. Require current environmental analysis of projects approved more than 5 years prior that result in more than 100 vehicle trips per day. Particularly traffic analysis.
4. Don't allow phasing of projects to circumvent and delay required mitigations such as traffic analysis, water quality and employee housing.

We are drafting a petition and we'd like community response and community involvement. Concerned citizens and Lake Tahoe lovers please send us your input and suggestions.
