TRPA,

Would like to strongly encourage TRPA to read and take into account the Independent Lake Tahoe Wildfire Evac Analysis conducted by by The Tahoe Clean Air at https://static1.squarespace.com/static/64148b655dc36a6ea811d09e/t/6718f64b2227973fdb6c2cc/1729689183516/10.23.24+Complete_Addendum+Final_Hi+Res_.pdf

This report should not be diminished, ignored, etc.

The proposed Barton Hospital and Healthcare Subdistrict is within and adjacent to the dense Kingsbury Town Center area and if approved, will increase the emergency evacuation capacity in the area.

The well publicized Barton Hospital complex should not be approved at all, and the zoning designation approval must not take place without conducting a full comprehensive EIS which should include an area plan roadway by roadway wildfire evacuation capacity analysis.

Thank you,
Gary Watts
Oliver Park Homeowner.
