RE: Letter of Support for Tahoe Valley Elementary School Construction and Modernization Project

Dear Governing Board and Project Staff,

On behalf of Lake Tahoe Community College (LTCC), I am writing to express my strong support for the proposed Tahoe Valley Elementary School (TVES) New Construction and Modernization Project, of the Lake Tahoe Unified School District (District). This project is currently under consideration by the Tahoe Regional Planning Agency.

The Project will replace non-permanent portable classroom buildings with permanent classrooms, replace aging asphalt paving, improve fire access to the campus, and generally modernize the existing campus facilities.

These upgrades to the campus are an important part of supporting future District educational instruction at the TVES site. This project is in alignment with LTCC district goals, as modernizing school facilities boosts student academic performance, enhances safety, improves energy efficiency, and fosters a better learning environment. These are critical components of increasing student educational attainment and supporting our community in becoming college- and career-ready.

I encourage the TRPA Governing Board and staff to approve this project to help achieve the goals and objectives outlined in the Measure U Bond Program approved by District voters in 2024.

Thank you for your time and consideration of this important matter.

Sincerely,

Laura Metune

RE: Letter of Support for the Lake Tahoe Unified School District Tahoe Valley Elementary School (TVES) New Construction and Modernization Project

Dear Governing Board and Project Staff,

I am writing to express my strong support for the proposed TVES New Construction and Modernization Project, which is currently under consideration by the Tahoe Regional Planning Agency. The Project will replace non-permanent portable classroom buildings with permanent classrooms, replace aging asphalt paving, improve fire access to the campus, and generally modernize the existing campus facilities.

These upgrades to the campus are essential to support future District educational instruction at the TVES site. I urge you to approve the TVES New Construction and Modernization Project for the following reasons:

- Modernizing school facilities boosts student academic performance, enhances safety, improves energy efficiency, and fosters a better learning environment.
- Upgrading aging facilities reduces maintenance costs, supports advanced technology integration, creates flexible, collaborative spaces, and ensures healthier, more inclusive environments for students and teachers.
- Replacement of the asphalt paving throughout the campus improves stormwater best management practices (BMPs) and provides enhanced parking and drop-off areas.
- TVES provides an important community function as a safe gathering space and supports public meetings, recreation, and youth sports.

Soroptimist International of South Lake Tahoe has worked with the Cumming Group and the District on the dugout construction and parking lot renovation project at Soroptimist Stadium: Home of Girls Softball at the South Tahoe Middle School partnering our donated funds and Measure U funds. I encourage the TRPA Governing Board and staff to approve this project to help achieve the goals and objectives outlined in the Measure U Bond Program approved by the residents in 2024.

Thank you for your time and consideration of this important matter.

Sincerely,

Rose Marie Ottman
