

LIST OF TABLES

CHAPTER 2: METHODOLOGY

Table 2-1	Reporting icon categories characterize the implementation status of TRPA adopted management standards and policy statements.	2-6
Table 2-2	Sources of applicable state and federal air and water quality standards.	2-8
Table 2-3	Indicator trend categories and associated definitions used to classify trends relative to standards in the reporting icon	2-12
Table 2-4	Trend confidence determinations based on both the r^2 -value and t-test significance. All of these determinations assume that the duration of trustworthy data factor is met. If not, then the final confidence determination for trend is low.....	2-14
Table 2-5	Overall confidence determinations based on confidence level determined for both status and trend	2-15

CHAPTER 3: AIR QUALITY

Table 3-1	TRPA threshold standards and state and federal air quality standards addressed for Tahoe regional air quality.....	3-2
Table 3-2	Summary of status and trend of air quality indicator reporting categories from the 2011 and 2015 Threshold Evaluation Reports	3-8
Table 3-3	Key to the reporting icon used to characterize the implementation status of management standards and policy statements.....	3-10

CHAPTER 4: WATER QUALITY

Table 4-1	Water quality standards for the Tahoe Basin aquatic system organized by the six major components of the Tahoe Basin's aquatic system. Each component is considered a separate indicator reporting category	4-4
Table 4-2	Summary of the status and trend of water quality indicator reporting Categories from the 2011 and 2015 Threshold Evaluation Reports. Icons for the groundwater and other lakes reporting categories are presented in Table 4-2 but indicator sheets are not included in the report	4-15
Table 4-3	Key to the Reporting icon used to characterize the implementation status of management standards and policy statements.....	4-18

CHAPTER 5: SOIL CONSERVATION

Table 5-1	Summary of threshold standards for the soil conservation category	5-2
Table 5-2	Comparison of soil conservation status and trend in the 2011 and 2015 Threshold Evaluation Reports.....	5-3
Table 5-3	Basis of land capability classification for Lake Tahoe Basin lands (from Bailey 1974).....	5-6
Table 5-4	Estimated impervious cover in each Bailey land capability class in the Lake Tahoe Region in 2015. Impervious cover in land capability class 1b and 2 are estimated to exceed allowable cover by 659.6 and 43 acres respectively. Cover in all other land capability classes is below the allowable level. Land capability data is based on the 2007 NRCS Soil Survey (USDA-NRCS 2007). Impervious cover estimates based on evaluations of high resolution LiDAR and multispectral data collected in August 2010 and permitted development between August 2010 and permitted development between August 2010 and August 2015	5-8

CHAPTER 6: VEGETATION PRESERVATION

Table 6-1	Summary of vegetation indicator reporting categories, adopted TRPA threshold standards by type, and indicators used to assess adopted standards	6-4
Table 6-2	Vegetation preservation status & trend summary	6-8
Table 6-3	A key to the reporting icon used to characterize the implementation status of management standards and policy statements.....	6-10

CHAPTER 7: FISHERIES

Table 7-1	TRPA adopted threshold standards for fisheries	7-4
Table 7-2	Fisheries status & trend summary	7-5
Table 7-3	Key to the reporting icon used to characterize the implementation status of management standards and policy statements.....	7-6

CHAPTER 8: WILDLIFE

Table 8-1	Summary of wildlife indicator reporting categories and adopted TRPA threshold standards by type and indicators used to assess adopted standards	8-2
Table 8-2	Summary of status and trend of wildlife indicator reporting categories from the 2011 and 2015 Threshold Evaluation Reports.....	8-3
Table 8-3	Key to the reporting icon used to characterize the implementation status of management standards and policy statements.....	8-5

CHAPTER 9: SCENIC RESOURCES

Table 9-1	Summary of adopted threshold standards for the scenic resources threshold category	9-2
Table 9-2	Summary of status and trend of scenic indicator reporting categories from the 2011 and 2015 Threshold Evaluation Reports.....	9-3
Table 9-3	Key to the reporting icon used to characterize the implementation status of management standards and policy statements.....	9-4
Table 9-4	Summary of the status and trend determinations for all roadway travel units in the Lake Tahoe Region based on the evaluation period 1982 through 2015. Detailed information on the scores of these travel units can be found in Appendix G of this report.....	9-7
Table 9-5	Summary of the status and trend determinations for all shoreline travel units in the Lake Tahoe Region based on the evaluation period 1982 through 2015. Detailed information on the scores of these travel units can be found in Appendix G of this report.....	9-16
Table 9-6	Community Design Evaluation of Recent Development.	9-43

CHAPTER 10: NOISE

Table 10-1	TRPA adopted and recommended threshold standards for noise	10-2
Table 10-2	Noise status & trend summary	10-4
Table 10-3	Key to the reporting icon used to characterize the implementation status of management standards and policy statements.....	10-7

CHAPTER 11: RECREATION

Table 11-1	Summary of status and trend of recreation indicator reporting categories from the 2011 and 2015 Threshold Evaluation Reports	11-2
------------	--	------

Table 11-2 Key to the reporting icon used to characterize the implementation status of management standards and policy statements	11-2
---	------

CHAPTER 12: IMPLEMENTATION AND EFFECTIVENESS OF THE 1987 TRPA REGIONAL PLAN

Table 12-1 TRPA Project Applications by Calendar Year 2011 to 2015.....	12-12
Table 12-2 TRPA Code Compliance Activities by Calendar Year 2013-2015.....	12-13
Table 12-3 Summary of units of use, bonus units, and commercial floor area inventory	12-17
Table 12-4 Summary Units of Use Changes from 2012 Regional Plan Amendments to 2015 Threshold Evaluation	12-18
Table 12-5 Estimated banked development rights by location as of December 31, 2015	12-19
Table 12-6 Residential units accounting as of December 31, 2015	12-20
Table 12-7 Residential Allocation Provided to Jurisdictions	12-21
Table 12-8 Commercial floor area accounting as of December 31, 2015.....	12-22
Table 12-9 Existing commercial floor area by land capability and land use district as of December 31, 2015.....	12-23
Table 12-10 Commercial Floor Area Allocations (in square feet)	12-23
Table 12-11 Tourist accommodation units accounting as of December 31, 2015	12-24
Table 12-12 Existing tourist accommodation units by land capability and land use district as of December 31, 2015.....	12-25
Table 12-13 Cumulative accounting of PAOT allocations.....	12-26
Table 12-14 Recreational allocations in Persons At One Time (PAOTS).....	12-26
Table 12-15 Change in Daily Vehicle Trip Ends (DVTE) and Vehicle Miles Traveled (VMT)	12-27
Table 12-16 New impervious land coverage acres by evaluation period	12-27
Table 12-17 Total area and estimated impervious cover within each land capability class in 2015.....	12-28
Table 12-18 2015 Sewage Disposal Capacity in Millions of Gallons per Day (MGD)	12-31
Table 12-19 TRPA capital improvement expenditures 2010-2015	12-32
Table 12-20 Project type by mitigation fund source (percent of funds expended and obligated	12-32
Table 12-21 Rental car mitigation fee revenue and expenses (by fiscal year, in dollars) .	12-35

CHAPTER 13: CONCLUSIONS AND RECOMMENDATIONS

Table 13-1 SMART-based criteria. Questions to assess the extent to which the existing threshold standards are consistent with criteria based on the SMART framework for objective setting. SMART represents important criteria that have proven useful in defining indicators, however, organizations often ascribe slightly different definitions for each component of the SMART criteria	13-18
Table 13-2 Standard categorization questions. Standard categorization questions are intended to group standards in ways that might be insightful to decision makers but do not always have an innate positive or negative quality. These categorization questions are intended to be combined with SMART-based criteria to provide additional insight into standard content and help focus on attention	13-19
