

61.1.9. Commercial Tree Removal

A. General Standard

Trees may be removed as a commercial enterprise pursuant to the tree removal practices of subsection 61.1.6.

B. Cutting and Cultivation of Christmas Trees

Legally existing Christmas tree cultivation operations, when certified by a qualified forester to be utilizing native species and proper silvicultural methods, may continue upon approval by TRPA. New Christmas tree farm operations meeting the above conditions may be permitted if TRPA finds them to be in compliance with the Code and the applicable plan area statements.

61.2. PRESCRIBED BURNING

61.2.1. Purpose

This section sets forth standards and regulations pertaining to the use of fire in controlled circumstances for vegetation management.

61.2.2. Applicability

The standards and regulations in this section apply to all intentional burning for the purpose of vegetation management, unless otherwise exempt from TRPA review under the provisions of Chapter 2: *Applicability of the Code of Ordinances*.

61.2.3. Prescribed Burning

A. Prescribed Burning Allowed

Persons who own or manage forests or range lands may use prescribed burning, consistent with the standards and regulations set forth in this section, to maintain forest health and diversity and to reduce the risk of wildfire.

B. Limitations

Prescribed burning shall be limited to the following activities:

1. Seral stage management;
2. Fuels management;
3. Wildlife habitat management;
4. Silviculture; or
5. Pest control.

61.2.4. Performance Standards

The use of prescribed burning for vegetation management shall comply with the standards provided below.

A. Location of Prescribed Burning

The use of prescribed burning shall be limited to those areas where the plan area statements designate as a permissible use one or more of the following uses:

1. Nonstructural wildlife habitat management;
2. Range improvement;
3. Fuels management; or

CHAPTER 61: VEGETATION AND FOREST HEALTH

61.2 Prescribed Burning 61.2.5 Compliance Program

4. Prescribed fire management.
- B. Extent of Prescribed Burning**

Each prescribed burn shall be limited to the minimum area necessary to achieve the purpose of the prescription.
 - C. Timing of Prescribed Burning**

Prescribed burning shall be limited to time periods for which TRPA finds that atmospheric conditions normally will allow complete dispersion of the smoke from the prescribed burn during each day of the burn.
 - D. Responsible Persons**

A qualified expert, experienced in the use of fire for vegetation management, shall prepare a burning prescription for review and, if appropriate, approval by TRPA. The expert shall certify that the prescription meets the standards of this section. The expert shall oversee the conduct of the burn.
 - E. Standards of Other Government Agencies**

All prescribed burning shall comply with applicable standards of other government agencies with appropriate jurisdiction, including but not limited to the following agencies: the El Dorado County Air Pollution Control District; the Placer County Air Pollution Control District; the California Air Resources Board; the California State Water Resources Control Board; the California Regional Water Quality Control Board; the Nevada Division of Environmental Protection; the California and Nevada Departments of Forestry; and the United States Forest Service. Where TRPA standards conflict with another agency's standards, the most stringent standard shall control.

61.2.5. Compliance Program

To achieve compliance with the standards in subsection 61.2.4, TRPA shall apply the following provisions:

- A. Consistency with Primary Use**

TRPA shall review and, if appropriate, approve applications to conduct prescribed burns consistent with the provisions of Chapter 21: *Permissible Uses*, regarding allowed and special uses for those uses listed in subparagraph 61.2.4.A.
- B. Burn Prescription**

All applications to conduct prescribed burning shall be accompanied by a burn prescription. A burn prescription shall include the following items:

 1. Detailed statement of the purpose of the prescribed burn;
 2. Description, including a map at an appropriate scale of the location and a real extent of the prescribed burn. Such description shall allow TRPA to determine whether the proposed burn complies with subparagraphs 61.2.4.A and 61.2.4.B;
 3. Description of the timing of the prescribed burn, and meteorological information that demonstrates that the timing of the prescribed burn will normally allow complete dispersion of the smoke from the burn during each day of the burn;
 4. A list of the applicable standards of TRPA and other government agencies with jurisdiction over the burn, and a discussion of how the proposed prescription complies with those standards;

CHAPTER 61: VEGETATION AND FOREST HEALTH

61.3 Vegetation Protection and Management

61.3.1 Purpose

5. A detailed description of the proposed burning operation, including a description of all safety procedures that will be used to prevent wildfire;
6. A certification by a qualified expert experienced in the use of fire for vegetation management that the burn prescription complies with this section; and that the expert shall oversee the conduct of the burn to ensure that the prescription is followed; and
7. Other information that TRPA may require.

61.3. VEGETATION PROTECTION AND MANAGEMENT

61.3.1. Purpose

In accordance with the Vegetation Conservation Element of the Regional Plan Goals and Policies, this section provides for the protection of Stream Environment Zone (SEZ) vegetation, other common vegetation, uncommon vegetation, and sensitive plants. It also provides for remedial management of vegetation to achieve and maintain environmental thresholds for plant species and structural diversity, and the maintenance of vegetation health. The management and protection of vegetation shall, at a minimum, consider the diversity of plant species and landscape pattern of plant communities, and their attributes in relationship to wildlife and fisheries habitat, scenic quality, recreation use, soil conservation, and water quality.

61.3.2. Applicability

TRPA requires the protection and maintenance of all native vegetation types. TRPA may require the preparation and implementation of a remedial vegetation management plan for any parcel where the need for remedial vegetation management has been identified for purposes of environmental threshold maintenance or attainment.

61.3.3. Protection of Stream Environment Zones

A. General Requirement

Unless excepted in B below, no project or activity shall be undertaken in an SEZ (Land Capability District 1b) that converts SEZ vegetation to a non-native or artificial state or that negatively impacts SEZ vegetation through action including, but not limited to, reducing biomass, removing vegetation, or altering vegetation composition.

B. Exceptions

The activities below are exceptions to the general requirement in A above.

1. Manipulation or management of SEZ vegetation may be permitted in accordance with the Code for purposes of SEZ vegetation health or wildlife or fish habitat improvements, and after approval of a vegetation management plan pursuant to subparagraph 61.3.5.B, or as provided in Section 30.5, subsection 30.4.4, subparagraph 30.4.6.D.3, Section 63.3, or Sections 61.1 or 61.2.
2. Maintenance of landscaping that was installed prior to the creation of TRPA, or installed for the purpose of scenic quality pursuant to Chapter 36: *Design Standards*, or pursuant to a TRPA permit, or under a TRPA exemption prior to August 1, 1997, provided that fertilizer use is restricted in accordance with the BMP Handbook and described in subparagraph 60.1.8.A, unless a remedial action pursuant to subsection 61.3.4 has been taken by TRPA.
