

LIST OF TABLES

CHAPTER 1: INTRODUCTION

Table 1-1	Reporting icon categories used to characterize the implementation status of a TRPA adopted Management Standard	1-12
-----------	--	------

CHAPTER 2: METHODOLOGY

Table 2-1	Sources of applicable state and federal air and water quality standards	2-3
Table 2-2	Indicator trend categories and associated definitions used to classify trends relative to standards in the reporting icon	2-8
Table 2-3	Trend confidence determinations based on both the r^2 -value and t-test significance. All of these determinations assumed that the duration of trustworthy data factor was affirmatively met. If not, then the final confidence determination for trend was low	2-10
Table 2-4	Aggregation matrix used to determine overall status, trend, and confidence for the Sensitive Plants Indicator Reporting Category. Aggregation results are shown using reporting icons in Figure 2-4.....	2-13

CHAPTER 3: AIR QUALITY

Table 3-1	TRPA Threshold Standards and state and federal air quality standards addressed for Tahoe regional air quality	3-3
-----------	---	-----

CHAPTER 4: WATER QUALITY

Table 4-1	Water quality standards for the Tahoe Basin aquatic system organized by the six major components of the Tahoe Basin's aquatic system. Each component is considered a separate Indicator Reporting Category	4-4
-----------	--	-----

CHAPTER 5: SOIL PRESERVATION

Table 5-1	Summary of adopted Threshold Standards for the Soil Conservation Threshold Category	5-2
Table 5-2	Basis of land capability classification Lake Tahoe Basin lands (from Bailey 1974)	5-4
Table 5-3	Estimates of land coverage (includes soft and hard land cover) within the Lake Tahoe Region in 2010, relative to Bailey land capability classes. Land capability class 1b and 2 are shown to be exceeding allowable coverage targets by 670 and 43 acres, respectively. All other land capability classes are within allowable limits. Land capability data are based on 2007 NRCS Soil Survey (NRCS 2007). Impervious cover estimates are interpreted from high-resolution LiDAR and multispectral data collected in August of 2010.	5-7
Table 5-4	Estimates of hard land coverage within the Lake Tahoe Basin relative to land capability classes in 2002 and reported in the 2006 Threshold Evaluation. Land capability class 1b (highlighted) is shown to be exceeding allowable cover by 365 acres. All the other land capability classes are in compliance with coverage limitations. Land capability data were based on updated soil data provided by NRCS (NRCS 2007). Hard land coverage estimates were derived from an interpretation of IKONOS multispectral imagery (2002). , Note that data are for hard land coverage only, soft land coverage is not included. User's classification error was reported to be 87%.....	5-8

Table 5-5	SEZ restoration projects completed from 2005-2011. Source: EIP database, 2001 and 2006 Threshold Evaluations	5-16
Table 5-6	Vegetation enhancement acres from 2005 to 2010. Source: EIP database.....	5-18

CHAPTER 6: VEGETATION PRESERVATION

Table 6-1	Summary of Vegetation Indicator Reporting Categories, adopted TRPA Threshold Standards by type, and indicators used to assess adopted standards.....	6-3
-----------	--	-----

CHAPTER 7: FISHERIES

Table 7-1	Summary of Fisheries Indicator Reporting Categories, adopted TRPA Threshold Standards by type, and indicators used to assess adopted standards..	7-3
-----------	--	-----

CHAPTER 8: WILDLIFE

Table 8-1	Summary of Wildlife Indicator Reporting Categories and adopted TRPA Threshold Standards by type and indicators used to assess adopted standards...	8-3
-----------	--	-----

CHAPTER 9: SCENIC RESOURCES

Table 9-1	Summary of adopted Threshold Standards for the Scenic Resources Threshold Category	9-2
Table 9-2	Summary of the current status and trend determinations for all roadway travel units in the Lake Tahoe Region, 2011 based on the evaluation period 1982 through 2011	9-4
Table 9-3	Summary of the current status and trend determinations for all shoreline travel units in the Lake Tahoe Region, 2011 based on the evaluation period 1982 through 2011	9-12

CHAPTER 10: NOISE

Table 10-1	TRPA adopted and recommended Threshold Standards for noise	10-2
------------	--	------

CHAPTER 11: RECREATION

Table 11-1	Visitor Satisfaction for the Lake Tahoe Basin Management Unit (Fiscal Years 2005 and 2010)	11-4
Table 11-2	Activity Participation for the Lake Tahoe Basin Management Unit (Fiscal Years 2005 and 2010)	11-5
Table 11-3	Miles of Existing Bicycle and Pedestrian Facilities.....	11-7
Table 11-4	Cumulative Accounting of PAOT Allocations	11-9

CHAPTER 12: IMPLEMENTATION AND EFFECTIVENESS OF THE 1987 TRPA REGIONAL PLAN

Table 12-1a	Residential Allocations.....	12-25
Table 12-1b Development Right Utilization Summary	12-25
Table 12-2	Residential Allocation Transfers.....	12-26
Table 12-3	Residential Bonus Units	12-27
Table 12-4	Commercial Floor Area (CFA) Allocations	12-28
Table 12-5	Recreation Allocations in Persons At One Time (PAOTS).....	12-29
Table 12-6	Change (Δ) in Daily Vehicle Trip Ends (DVTE) and Vehicle Miles Traveled	

(VMT).....	12-29
Table 12-7 New Impervious Land Coverage by Evaluation Period.....	12-30
Table 12-8 Municipal Water Districts and Systems in the Lake Tahoe Basin.....	12-31
Table 12-9 Estimated Water Demand.....	12-32
Table 12-10 2010 Sewage Disposal Capacity in Millions of Gallons per Day (MGD)	12-35
Table 12-11 Stream Environment Zone Restoration (in Acres) 1980 to 2011.....	12-36
Table 12-12 TRPA Capital Improvement Expenditures (in Dollars)	12-36
Table 12-13 TRPA Project Type by Mitigation Funding Source (in Dollars).....	12-38
Table 12-14 Rental Car Mitigation Fee Revenue and Expenses (by Fiscal Year, in Dollars)	12-39
